## Abstracts

E-commerce buy now pay later (BNPL) Market is a payment method that allows customers to buy things online and pay for them in installments over time rather than paying the entire price at once. This payment option has grown in popularity in e-commerce since it gives customers greater freedom and affordability in their purchase decisions. In addition, customers that use BNPL may divide their purchase from e-commerce websites into numerous smaller installments, interest-free payments spread out over several weeks or months. This may assist clients to manage their cash flow and planning, especially for larger purchases or unexpected bills. Several factors have contributed to the significant growth of the e-commerce BNPL market in recent years. One significant cause is the rise in popularity of internet shopping, which has encouraged more individuals to shop at online merchants. Furthermore, the COVID-19 has speed up the shift to online shopping because more people are being forced to shop from home as a result of lockdowns and other social isolated measures. Another factor driving the growth of the E-commerce BNPL market is the convenience it offers to consumers. By allowing customers to postpone payment for their purchases, BNPL services make it easier for people to make larger purchases that they not be able to afford upfront. This can help to increase sales for online retailers, while also providing customers with more flexibility and convenience. Furthermore, the rise in the number of businesses providing these services is one of the most significant trends in the E-commerce buy now pay later market.

The global E-Commerce Buy Now Pay Later market size was estimated at USD 5608.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 29.30% during the forecast period.
