Report Overview

E-paper, which is also known as electronic paper, electronic ink, or e-ink, is a display technology applied to electronic devices, designed to mimic the appearance of traditional or ordinary ink on paper. E-paper is a special type of display that does not emit light or require electricity to create images like LCD or LED displays. Unlike these traditional displays, e-paper displays reflect light just like ordinary paper does. This makes the e-paper easier on the eyes of the reader, as there are no glares or light reflections. This also makes it more readable in various lighting conditions, whether it be bright sunlight or dim lighting.
