Report Overview

An online school (virtual school or e-school or cyber-school) teaches students entirely or primarily online or through the internet. An online school can mimic many of the benefits provided by a physical school (learning materials, online exercises, self-paced courses, live online classes, tests, web forums, etc) but delivers these through the internet. Physical interaction by students and teachers is unnecessary, or only supplementary. Online schools may also enable individuals to earn transferable credits or to take recognised examinations, to advance to the next level of education.

The global E-school market size was estimated at USD 3846 million in 2023 and is projected to reach USD 11553.55 million by 2032, exhibiting a CAGR of 13.00% during the forecast period.

North America E-school market size was estimated at USD 1237.94 million in 2023, at a CAGR of 11.14% during the forecast period of 2024 through 2032.
