According to the classification of micro switches, mechanical keyboards can be divided into traditional tea shaft, green shaft, white shaft, black shaft, red shaft, Romer-G and optical shaft. It is precisely because each button is composed of an independent micro-movement, so the button has a strong sense of paragraph, which produces a special feel suitable for game entertainment, so it is usually used as a relatively expensive high-end game peripheral. To sum up, the e-sports mechanical keyboard is a professional competition-level mechanical keyboard for gaming players. Mechanical keyboards have grown in popularity over the past few years due to their durability, tactile feedback, and customization options. According to the data, the global mechanical keyboard market is expected to grow at a CAGR of 9.2% from 2022 to 2029. The growth of the mechanical keyboard market can be attributed to increased demand for gaming peripherals, rise of e-sports, and increasing popularity of programming and typing. In terms of the global market, North America dominates the mechanical keyboard market, followed by Europe and Asia Pacific. The Asia Pacific region is expected to witness the highest growth rate owing to the increasing demand for gaming peripherals in countries such as China, Japan, and South Korea. Specific to the Chinese market, according to QYResearch data, China is the world's largest mechanical keyboard market, with a market share of about 40% in 2021. This can be attributed to the increasing popularity of gaming in China, resulting in increased demand for gaming peripherals such as mechanical keyboards. In addition, the Chinese market also has many e-commerce platforms such as Taobao, JD.com, and Tmall. Consumers

can purchase mechanical keyboards online more conveniently. This has led to the growth of the online retail market for mechanical keyboards in China, which is expected to continue to grow in the coming years. In short, with the rise of e-sports and netizens' pursuit of keyboard life and feel, the market share of e-sports mechanical keyboards has gradually increased. However, the current mechanical keyboards are no longer limited to scenarios such as e-sports and game applications. Keyboard manufacturers have also begun to launch silent and noise-cancelling keyboards for office use, keyboards for female audiences, and diversified keyboards with special equivalents and key shaft types. Of course, the development of mechanical keyboards is also limited by their high prices.

The global E-sports Mechanical Keyboard market size was estimated at USD 1132.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.20% during the forecast period.
