Abstracts

EAS (Electronic Article Surveillance) security labels and tags are anti-theft devices used in retail environments to prevent shoplifting. These small, often inconspicuous devices are attached to merchandise and contain electronic circuits or magnetic strips that interact with detection systems at store exits. When an item with an active EAS tag passes through the detection zone without being deactivated or removed at checkout, an alarm is triggered, alerting store personnel to potential theft. EAS security labels are typically adhesive and can be attached directly to products or packaging, while hard tags are reusable and often affixed with a pin. These security solutions are widely used to protect a variety of goods, ranging from clothing and electronics to groceries and pharmaceuticals, enhancing inventory security and reducing losses due to theft. The EAS (Electronic Article Surveillance) security labels and tags market is experiencing steady growth, driven by the increasing need for retailers to protect products from theft and improve inventory management. With the rise of retail theft, both in-store and through e-commerce channels, the demand for effective security solutions is expanding. Advancements in technology, such as RFID integration and more sophisticated EAS tags that offer better tracking and anti-theft features, are boosting market development. Additionally, the growth of self-checkout systems and omni-channel retailing is prompting the adoption of more integrated and discreet security solutions. However, challenges like the initial cost of implementation, particularly for small retailers, and concerns over the environmental impact of disposable tags, could limit the pace of adoption. As the market matures, innovation, cost reduction, and sustainability will be key drivers shaping the future growth of the EAS security labels and tags industry.

The global EAS Security Labels and Tags market size was estimated at USD 1765.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
