Abstracts

An edge-emitting laser diode is a semiconductor laser that works by emitting a beam from the side. It is a common laser diode and is widely used in optical communications, laser printing, laser scanning, fiber optic communications and other fields. One of the future EELD development trends is to improve speed and efficiency to meet the growing communication needs. This could include higher data transfer speeds and lower power consumption. EELDs may be integrated with other optoelectronic components, such as optical modulators, photodetectors, and wavelength division multiplexers, on a single chip to increase integration and performance. The EELD market is highly fragmented and diverse. Each application is geared towards a specific supply chain/value chain, and EEL manufacturers must position themselves in different models to enter different markets. The global main manufacturers of Edge Emitting Laser Diode include Coherent Corp., Lumentum, Sony, Anritsu, ams OSRAM and Jenoptik, etc. In 2024, the global 3 largest players have a share approximately 45% in terms of revenue. While Communications Industry segment is altered to an 10.24% CAGR throughout this forecast period and will hold a share about 38.25% in 2030. The growing demand for capacity encourages the adoption of edge emitting laser across the Datacom and Telecom markets. Demand for capacity in the Datacom market is driven by the growing needs of LANs and WANs. Growth in Datacom is also driven by web and cloud services companies that are expanding data center infrastructure, increasing the need for network capacity within and between these data centers. Emerging applications such as 3D sensors and LiDAR, medical and lighting applications will flourish in the coming years and may become potential killer applications for EELD in the medium and long term.

The global Edge Emitting Laser Diode market size was estimated at USD 1568.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.30%

during the forecast period.
