Abstracts

Education Facilities Management Software is a professional digital management platform designed specifically for K-12 schools, higher education institutions, vocational schools, and educational training institutions. Based on technologies such as the Internet of Things (IoT), mobile internet, data visualization, and full asset lifecycle management, it integrates the physical facilities (such as teaching buildings, laboratories, and venues), teaching equipment (such as teaching aids, research instruments, and multimedia equipment), space resources (such as classrooms, meeting rooms, and dormitories), and operation and maintenance services (such as repair, cleaning, and energy consumption) of educational institutions. This enables standardized, visualized, and intelligent management of the entire lifecycle of educational facilities, from planning and construction to use, maintenance, and disposal. It addresses pain points such as low facility operation and maintenance efficiency, idle space resources, lack of asset supervision, and high compliance risks. It ensures the continuity of teaching activities and research work, optimizes the allocation of educational resources, reduces operating costs, and provides data support for decisions regarding facility upgrades and space planning.

The global Education Facilities Management Software market size was estimated at USD 1529.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
