An E-ink phone is a smartphone that utilizes E-Ink display technology. Unlike traditional LCD or OLED screens, an E-Ink screen forms text and images through tiny electronic particles, resulting in a display similar to paper, offering a more comfortable reading experience and reducing eye strain. E-ink phones are known for their low power consumption, significantly extending battery life, making them ideal for extended use. While E-Ink screens have limitations in color reproduction and refresh rates, they offer high contrast and clarity, making them particularly suitable for reading text, browsing the web, and checking emails?especially favored by users who enjoy reading and seek battery efficiency.
