Abstracts

An Elderly Monitoring System is a technology-driven solution designed to track and support the well-being of older adults. These systems utilize a combination of sensors, wearable devices, and software to monitor vital signs, activity levels, and potential hazards like falls. They provide real-time data to caregivers and family members, enabling prompt intervention in emergencies. These systems aim to promote independent living while ensuring safety and peace of mind. They can include features like medication reminders, GPS tracking, and two-way communication, enhancing overall care and quality of life. The elderly monitoring system industry is experiencing rapid growth fueled by an aging global population and advancements in technology. Key trends include the integration of artificial intelligence (AI) for predictive health analytics, enabling early detection of potential health issues. Wearable technology is becoming more sophisticated, with devices that can monitor a wider range of vital signs and activities. There's also a strong emphasis on personalized care, with systems that can adapt to individual needs and preferences. The Internet of Things (IoT) is playing a crucial role, connecting various devices and enabling seamless data sharing. Furthermore, there is an increase in the development of non-intrusive monitoring solutions, like radar based systems, that can monitor individuals without the use of cameras, increasing user privacy. Telehealth integration is also expanding, allowing for remote consultations and medical advice. The market is also seeing a rise in the development of user-friendly interfaces and mobile apps, making these systems more accessible to both elderly users and their caregivers. Finally, data privacy and security are paramount, with companies investing heavily in robust cybersecurity measures to protect sensitive health information.

The global Elderly Monitoring System market size was estimated at USD 146.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60%
