Abstracts

An electric compact sweeper is a small, environmentally friendly street cleaning machine powered by electricity instead of traditional fossil fuels. These sweepers are designed for urban environments, particularly in areas with limited space or tight corners, such as sidewalks, parking lots, and city streets. They are equipped with brushes and vacuum systems to remove debris, dust, and litter from surfaces, while the electric motor reduces noise pollution and emissions compared to gas-powered models. The compact size allows for efficient maneuverability in congested areas, making them ideal for municipal maintenance in cities aiming to reduce their carbon footprint. Electric compact sweepers offer a sustainable solution for maintaining clean urban spaces while promoting environmental responsibility.
