## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Electric Heating Carpet competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An electric heating carpet is a type of floor covering that has built-in heating elements designed to provide warmth to a room. It works by using electricity to heat up these elements, which are usually embedded within the carpet or placed underneath the surface. The heat generated by the carpet can warm up the floor and, by extension, the room, making it more comfortable in cold weather. Electric heating carpet is a carpet for quick and efficient heating. Electric heating carpets have the characteristics of pressure resistance, easy cleaning, anti-mold and anti-bacteria, non-slip, and comfortable feeling. With the gradual increase in market concentration and the expansion of downstream markets, the electric heating carpet industry is still in its growth stage and has great market development potential. According to the development trend of the electric heating carpet industry, with the relatively mature development of the industry and the application of new materials and new technologies, electric heating carpets will become more intelligent and equipped with advanced intelligent temperature control systems. They can automatically adjust the heating power according to the ambient temperature and the temperature set by the user, achieve precise temperature control, and improve energy utilization efficiency and comfort of use. With the rapid penetration of mobile Internet and the Internet of Things, consumers are choosing to purchase electric heating carpets through online channels at a faster pace. At the same time, benefiting from the small size and low price of electric heating carpets, online sales on the Internet will be further increased.

The global Electric Heating Carpet market size was estimated at USD 58.8 million in
