Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Electric Jaw Crusher competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of electric jaw crushers reached 58,000 units, with an average selling price of US\$32,000 per unit. Electric jaw crushers utilize an electric motor to drive an eccentric shaft, crushing materials through compression and impact between the movable and fixed jaws. They offer advantages such as high efficiency, energy saving, environmental friendliness, low noise levels, and easy maintenance. They are widely used in mining, building materials, cement, waste recycling, and infrastructure projects. Upstream Raw Materials and Major Companies: Mainly include high-strength steel, alloy castings, motors, and reducers. Core suppliers include ArcelorMittal, Baowu Steel, Schaeffler, and Siemens. Downstream Applications and Major Companies: Customers primarily include mining companies (Rio Tinto, BHP Billiton, and Zijin Mining), cement and building materials groups (Conch Cement and Lafarge Holcim), and waste recycling and processing companies (Waste Management and Veolia). Future prospects: ? Develop towards intelligence (equip with IoT sensors to monitor equipment health and energy consumption in real time); ? Transform towards green and environmentally friendly technologies (optimize electric drive systems to reduce carbon emissions and replace diesel-powered models); ? Expand applications in construction waste recycling and urban renewal projects; ? Integrate with mobile crushing stations to meet flexible crushing needs in multiple scenarios.
