## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Electric Piling Rig competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Electric Piling Rig production reached approximately 4.85k units, with an average global market price of around US\$ 175000 per unit. An electric piling rig is a specialized construction machine powered by electricity (often via battery packs or grid connection) used to drive piles into the ground to provide foundational support for structures such as buildings, bridges, or renewable energy installations (e.g., wind turbines, solar farms).
