An electric rearview mirror, also known as a power-adjustable rearview mirror, is an automotive component that allows drivers to electronically adjust the angle of the interior or exterior mirrors via a control switch or button, eliminating the need for manual positioning. These mirrors enhance driver convenience, safety, and ergonomics by enabling quick and precise adjustments without physical contact, often integrating additional features such as auto-dimming to reduce glare, integrated turn signals, heating elements for defogging, and even cameras or displays for advanced driver assistance systems (ADAS).
