Abstracts

The electric three-wheeler market encompasses a segment of light electric vehicles designed for both passenger and cargo transport, characterized by three-wheeled configurations that offer enhanced stability, maneuverability, and load-bearing capacity compared to two-wheeled alternatives. These vehicles are typically powered by rechargeable battery systems, such as lithium-ion or lead-acid, and are increasingly adopted in urban and semi-urban settings due to their lower operating costs, reduced environmental impact, and suitability for last-mile connectivity.
