Report Overview

An eVTOL is an Electric Vertical Take-Off and Landing Vehicle. Vertical Take-Off vehicles do not require an extended runway to fly. These vehicles can land in your yard or driveway as well as designated parking lots and vertiports. An electric vertical take-off and landing (eVTOL) aircraft uses electric power to hover, take off, and land vertically. This technology came about thanks to major advances in electric propulsion (motors, batteries, fuel cells, electronic controllers) and the growing need for new vehicles for urban air mobility (air taxi).
