Report Overview

An Electro-Mechanical Brake (EMB) system is an advanced braking system that uses electric motors and sensors to apply the brake force. Unlike traditional hydraulic brake systems that use pressure to apply the brakes, EMB systems use electric signals sent from the brake pedal to the brake actuator to engage the brakes. In an EMB system, the electric motor acts directly on the brake discs or drums, using a transmission mechanism such as a screw or gear to generate the necessary force to apply the brakes.
