Abstracts

Electro-pneumatic positioners are used with rotary air actuators to accurately position control valves used in throttling applications. These valve positioners convert a 4-20mA input control signal to a proportional pneumatic output. This output is fed to an air actuator which in turn controls the valve position and flow (combined with mechanical feedback). Air actuated valves with positioners have a history of rugged and reliable service in tough applications. In terms of type, the types of electro-pneumatic positioners include: single acting positioners and double acting positioners, of which double acting positioners holds a share of about 67% in the global market. And in terms of application, the largest market is held by oil and gas industry, followed by pharmaceutical manufacturing. The main players are Emerson, Flowserve, Siemens and ABB, etc. Among them, Emerson, Rotork, and Siemens occupy a share over 37%.

The global Electro Pneumatic Positioners market size was estimated at USD 204.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
