Electromagnetic threats have been known, and to a degree understood, for almost a century. Nevertheless, it is only in the past couple of decades that governments and military organizations have come to realize the extent of the threat that intentional/unintentional electromagnetic interference (IEMI/UEMI) pose to critical facilities, infrastructure, aerospace, and land mobile electronic systems. Most nations' electrical infrastructure and utilities have been identified as vulnerable to sabotage and intentional disruption using IEMI, the threat to these systems has been a known entity for many years. What is an emerging unknown, and possibly equally as disruptive, is the new threat to digital and communications network infrastructure (data centers and internet systems) that the world's banking, transportation, and resource allocation now relies on.
