## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Electronic Anti-glare Mirror competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Electronic Anti-glare Mirror is a type of rearview mirror specially designed to enhance driving safety and comfort. It detects strong light from vehicles behind through built-in light-sensitive components (such as photodiodes) and automatically adjusts the reflectivity of the mirror surface to darken it and reduce glare.
