Abstracts

Electronic article surveillance (EAS) is a technological method for preventing shoplifting from retail stores, pilferage of books from libraries or removal of properties from office buildings. Special tags are fixed to merchandise or books. These tags are removed or deactivated by the clerks when the item is properly bought or checked out. At the exits of the store, a detection system sounds an alarm or otherwise alerts the staff when it senses active tags. Some stores also have detection systems at the entrance to the restrooms that sound an alarm if someone tries to take unpaid merchandise with them into the restroom. For high-value goods that are to be manipulated by the patrons, wired alarm clips called spider wrap may be used instead of tags. Global Electronic Article Surveillance (EAS) System key players include Checkpoint Systems, Tyco Retail Solutions, Hangzhou Century Co., Ltd, etc. Global top three manufacturers hold a share over 45%. North America is the largest market, with a share over 30%, followed by Europe, and Asia-Pacific, both have a share over 55 percent. In terms of product, Soft Tag is the largest segment, with a share over 85%. And in terms of application, the largest application is Supermarkets and Large Grocery, followed by Clothing and Fashion Accessories, Cosmetics or Pharmacy, etc.

The global Electronic Article Surveillance System market size was estimated at USD 1639.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
