### Report Overview

Electronic Blood Pressure Meter is a medical device that can measure blood pressure by modern electronic technology and the principle of blood pressure indirect measurement. A digital blood pressure monitor is a device used to measure blood pressure, composed of an inflatable cuff to collapse and then release the artery under the cuff in a controlled manner, and a mercury or mechanical manometer to measure the pressure. It is always used in conjunction with a means to determine at what pressure blood flow is just starting, and at what pressure it is unimpeded. Manual sphygmomanometers are used in conjunction with a stethoscope.
