Abstracts

Electronic Design Automation (EDA) refers to a category of software tools used for designing electronic systems such as integrated circuits (ICs), printed circuit boards (PCBs), and system-on-chips (SoCs), encompassing functionalities from schematic capture, simulation, and verification to physical layout and manufacturing preparation. The global EDA market is valued at over \$12 billion and is projected to grow steadily, driven by increasing semiconductor complexity, the proliferation of IoT devices, and advancements in AI and 5G technology. Key players such as Synopsys, Cadence Design Systems, and Siemens EDA dominate the industry, offering integrated tool suites that cater to various design stages. Regional analysis shows North America and Asia-Pacific as the largest markets, with strong demand from fabless semiconductor companies, IDMs (integrated device manufacturers), and foundries. Emerging trends include the adoption of cloud-based EDA solutions, AI/ML integration for design optimization, and growing emphasis on security and reliability in chip design. Despite high barriers to entry due to technical complexity and intellectual property accumulation, the market remains dynamic with opportunities in specialized niches like automotive electronics, aerospace, and quantum computing design tools.

The global Electronic Design Automation market size was estimated at USD 14000.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 8.50% during the forecast period.
