Report Overview

Helium, with the chemical formula He, is a colorless, odorless, non-toxic, non-corrosive gas. It is a rare gas with very inactive chemical properties and incombustibility. It is difficult to react with other substances under normal conditions. . It mainly comes from natural gas wells. Although helium is the second most abundant element in the universe, after hydrogen, it is extremely rare and limited on Earth. In the atmosphere, the volume concentration of helium is only 0.0005%, so it cannot be obtained in large quantities by air separation. Electronic helium has very high requirements on purity.
