## Abstracts

An electronic motor protection relay is an electronic device used to monitor and protect electric motors. They detect abnormal conditions by monitoring the motor's current, voltage, temperature and other parameters, and take appropriate protective measures when a fault or overload is detected to prevent the motor from being damaged or overloaded. These relays are typically equipped with a variety of sensors, circuits, and controllers that respond quickly and break the circuit to protect the motor. Its functions include but are not limited to overload protection, short circuit protection, phase sequence protection, phase loss protection, etc. Electronic motor protection relays are widely used in industrial, commercial and residential areas to ensure safe operation and long life of electric motors. As an important part of the field of motor protection and automation control, the electronic motor protection relay market is closely related to the prosperity of the motor industry, the improvement of industrial automation levels, and the application of new technologies. With the rapid development of the industrial field and the widespread popularity of motor applications, the market size of electronic motor protection relays continues to expand. Especially in traditional fields such as automobiles, home appliances, and industrial control, as well as in emerging fields such as aerospace, new energy, and intelligent manufacturing, the demand for electronic motor protection relays has shown steady growth. In recent years, electronic motor protection relays have also made significant progress in technological innovation. New relay products have higher sensitivity, lower power consumption, smaller size and stronger anti-interference ability. At the same time, with the integration and application of technologies such as the Internet of Things, cloud computing, and big data, electronic motor protection relays have also achieved breakthroughs in aspects such as intelligence, remote monitoring, and fault diagnosis. To sum up, the electronic motor protection relay market has broad development prospects and huge market potential.
