## Abstracts

An electronic rearview mirror, also known as a digital rearview mirror, is an automotive safety and convenience device that replaces the traditional reflective mirror with a high-resolution LCD or OLED screen displaying a live video feed captured by a rear-facing camera; this system significantly expands the driver's field of view by eliminating obstructions such as headrests, passengers, or cargo, while also automatically adjusting brightness to reduce glare from trailing headlights and enhancing visibility in low-light or adverse weather conditions, ultimately offering a clearer, more reliable rear perspective compared to conventional mirrors.
