The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Electronic Sow Feeding System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Electronic sow feeding (ESF) systems are used to individually feed sows kept in groups while they are pregnant. Sows are marked with transponder ear tags and the feeding station adapts according to the diet of that particular sow ? only feeding the ration they are given throughout the day.
