Abstracts

Electrospun nanofibers have been extensively studied in recent years for use as catalysts. These nanofibers are made from a variety of polymers, metals, oxides, and salts, among others, through electrospinning, sometimes followed by postelectrospinning treatment. Electrospun nanofiber-based catalysts have demonstrated great potential in a variety of important chemical processes in energy and the environment. Catalysts are known as the "chips" of the chemical industry, capable of improving the efficiency of chemical reactions and facilitating large-scale production. Chemical synthesis, petrochemical refining, and environmental treatment are the three major application scenarios. According to our research, the global catalyst market size will be approximately USD 38 billion in 2022. Asia Pacific dominates the global catalysts market. Asia Pacific catalyst market is mainly driven by chemical, petrochemical and automotive industries. China is home to a large number of polymer and chemical manufacturing companies, which is contributing exponentially to the growth of the Asia Pacific catalyst market. Favored by growing domestic demand and low cost, China has emerged as a manufacturing destination for petrochemicals and chemicals. Americas is the second largest market by 2021. Among these, changing automotive environmental requirements in North America require environmental catalysts, which is significantly contributing to the growth of the North American catalysts market. Subsequently, the North American market is also expected to witness increasing demand for catalysts for converting heavy crude oil into lighter fractions such as gasoline, diesel, and kerosene. The Middle East and Africa is the most opportunistic market during the forecast period. The dominance of the oil and gas industry in Saudi Arabia, Qatar, Kuwait, and Oman, overlaid with the surging local demand for pharmaceuticals, packaging, construction, and automotive is expected to drive the growth of the chemical industry, which in turn is expected to contribute to the growth of the Middle East & Africa catalysts market.

The global Electrospun Nanofiber Catalyst market size was estimated at USD 436.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
