Report Overview

Eluxadoline API is an active pharmaceutical ingredient used in the formulation of drugs to treat irritable bowel syndrome with diarrhea (IBS-D). It functions as a mixed μ -opioid receptor agonist and δ -opioid receptor antagonist, modulating gut motility and reducing abdominal pain and diarrhea in patients. The API is a key component in branded medications such as Viberzi, which has gained regulatory approval in multiple markets, including the U.S. and Europe. Demand for Eluxadoline API is driven by the growing prevalence of IBS-D, increasing awareness of gastrointestinal disorders, and the expansion of specialty pharmaceuticals targeting chronic conditions. However, market growth faces challenges, including strict regulatory requirements, potential side effects such as pancreatitis, and competition from alternative therapies like rifaximin and antispasmodics. The API market is influenced by pharmaceutical manufacturers, contract development and manufacturing organizations (CDMOs), and the shift toward personalized medicine, with key players focusing on scalable production and compliance with Good Manufacturing Practices (GMP).

This report offers a comprehensive and in-depth analysis of the global Eluxadoline Api market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
