Abstracts

Emergency Blanket Poncho is an especially low-weight, low-bulk blanket made of heat-reflective, thin, plastic sheeting. The emergency blanket poncho market is expected to witness significant growth in the coming years. This can be attributed to the increasing demand for lightweight and portable emergency blankets that can also be used as ponchos during outdoor activities or emergencies. The North American market is expected to dominate the emergency blanket poncho market due to the high adoption of outdoor activities and the presence of a large number of camping and hiking enthusiasts in the region. The emergency blanket poncho market is highly fragmented, with several small and medium-sized players operating in the market. However, a few key players dominate the market, accounting for a significant share of the overall market revenue. These key players often have a strong distribution network and brand presence, giving them a competitive advantage over smaller players. The rising popularity of outdoor activities, such as camping, hiking, and trekking, presents a significant opportunity for the emergency blanket poncho market. Consumers are increasingly looking for lightweight and multipurpose products that can enhance their outdoor experience while ensuring safety. The increasing awareness about safety during outdoor activities is driving the demand for emergency blanket ponchos. Consumers are becoming more conscious of the need for emergency preparedness and are willing to invest in products that can provide protection and comfort during emergencies. Price sensitivity among consumers, especially in emerging markets, can pose a challenge for the emergency blanket poncho market. Consumers may opt for lower-priced alternatives or traditional blankets, limiting the market growth. The emergency blanket poncho market faces competition from alternative products such as traditional blankets, raincoats, and other outdoor gear that serve similar purposes. Manufacturers need to differentiate their products and highlight the unique features and benefits of emergency blanket ponchos to overcome this challenge.

The global Emergency Blanket Poncho market size was estimated at USD 307.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
