Emergency escape breathing devices (EEBDs) are the lifesaving devices that are used to evacuate or escape an unbreathable or poorly oxygenated environment containing hazardous conditions such as fire, smoke, poisonous gases, biological risks, and hazardous industrial and marine settings. The bag immediately provides airflow as soon as it is opened because it is a self-contained compressed air system. The device is ideal for use in restricted areas, as well as nautical, industrial, and oil and gas applications, and may be utilized for up to 15 minutes when a person wants to swiftly leave his immediate surroundings.
