Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Encapsulation Sports Bras competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Encapsulation sports bras are a type of sports bra specifically designed to provide individual support and encapsulation for each breast. Unlike compression sports bras, which compress the breasts against the chest wall, encapsulation sports bras have separate cups for each breast, similar to traditional bras. As more and more women incorporate sports into their daily lives, the demand for functional sports bras is growing. Encapsulated sports bras are gradually becoming an important category in the sports bra market due to their excellent support, comfort and functionality. As women pay more and more attention to sports health and brands continue to invest in product research and development and marketing, encapsulated sports bras will usher in a broader market development space in the next few years.
