## Abstracts

Enterprise Operations as a Service delivers business operational functions—such as HR, finance, supply chain, and IT—through cloud-based, service-oriented platforms. Instead of building and maintaining in-house enterprise systems, companies subscribe to agile services that integrate automation, analytics, and AI to enhance efficiency. This model supports digital transformation by streamlining processes, reducing capital expenditure, and enabling faster decision-making through real-time insights.

The global Enterprise Operations as a Service market size was estimated at USD 12502.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Enterprise Operations as a Service market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Enterprise Operations as a Service market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced
