Abstracts

Report Overview:

A Session Border Controller (SBC) is a network function which secures voice over IP (VoIP) infrastructures while providing interworking between incompatible signaling messages and media flows (sessions) from end devices or application servers.

Enterprise communications is in a state of transformation. Businesses are replacing conventional private branch exchange (PBX) systems with Voice over IP (VoIP) and Unified Communications (UC) solutions and cloud-based services to improve collaboration and productivity, as well as to contain capital and operating expenses. Today's mobile information professionals are no longer tethered to the office phone system—they can conduct business and interact with colleagues and customers from any place, at any time.

The Global Enterprise Session Border Controller (SBC) Market Size was estimated at USD 373.77 million in 2023 and is projected to reach USD 459.46 million by 2029, exhibiting a CAGR of 3.50% during the forecast period.

This report provides a deep insight into the global Enterprise Session Border Controller (SBC) market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, Porter's five forces analysis, value chain analysis, etc.

The analysis helps the reader to shape the competition within the industries and strategies for the competitive environment to enhance the potential profit. Furthermore,
