Report Overview

An enterprise tablet is a mobile computer device that is larger than a smartphone or a phablet and smaller than a laptop and is used in enterprises by individual consumers. The screen size of these enterprise tablets is greater than 7 inches and smaller than 14 inches. The growing adoption of bring your own device (BYOD) policy in enterprises is a major driving factor for the market. While the enterprise tablets are replacing the large laptops and desktops that cost the company, the demand for enterprise tablets has increased as they offer similar functionalities.
