Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Environmentally Friendly Industrial Cleaning Agents competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.In 2024, global sales of environmentally friendly industrial cleaning agents reached 1.85 million tons, with an average selling price of RMB 18,200 per ton. Environmentally friendly industrial cleaning agents mainly refer to industrial cleaning agent systems that use low-VOC, water-based, bio-based, or biodegradable formulas to replace traditional solvent-based cleaning chemicals. They are widely used in equipment manufacturing, electronics, food processing, automotive parts, energy and chemical industries, and public facility maintenance. Upstream raw materials include bio-based surfactants (coconut oil-based/corn sugar-based), water-based solvents (propylene glycol/lactic acid esters), chelating agents (GLDA/IDS), corrosion inhibitors, and additives. Bio-based raw materials account for approximately 42% of the total cost, solvents 28%, and functional additives 18%. Global total production capacity reached 2.3 million tons in 2024, with an average gross profit margin of approximately 24%–31%. Downstream consumption is structured as follows: machinery manufacturing accounts for 32%, electronics and precision equipment 21%, food processing and pharmaceutical cleanroom sectors 14%, and the automotive and transportation industries 18%. The demand for this product is primarily driven by increasingly stringent global environmental regulations (low VOCs, ban on chlorinated solvents), rising cleanliness standards in manufacturing, the widespread adoption of automated cleaning equipment on production lines, and the green alternative opportunities arising from ESG requirements. Future business opportunities are concentrated in three areas: first, the rapid penetration of bio-based alternative formulations (leading to continued expansion

+357 96 030922
info@marketpublishers.com

of upstream demand for palm oil, corn starch, etc.); second, ultra-low residue precision cleaning agents for the electronics manufacturing and new energy sectors; and third, integrated "equipment + consumables" solutions linked to automated cleaning equipment, offering stronger stickiness and profitability. Overall, this market is still in a phase of structural upgrading and accelerated substitution, and is expected to maintain considerable growth over the next 5-8 years.The core trend in the environmentally friendly industrial cleaning agent market is driven by a dual force of "strong substitution + high standards." On the one hand, global manufacturing customers are rapidly shifting from traditional chlorine-, phosphorus-, and high-VOC solvent systems to water-based, bio-based, and low-hazard chemical systems. This substitution speed is particularly pronounced in Europe, the US, Japan, and South Korea, where regulations are more stringent. This directly boosts the market share of high-performance environmentally friendly cleaning agents. On the other hand, downstream industries (such as power batteries, precision electronics, medical devices, and food processing) have significantly increased their requirements for cleaning residue, particulate matter control, non-corrosiveness, and material compatibility. This has transformed cleaning agents from "low-value-added consumables" into "key process materials," leading to a simultaneous increase in industry profit margins and technological barriers.From the supply side, competition is shifting from formula cost competition to competition for technological solutions, including customized formulations, online cleaning process optimization, and collaborative development of cleaning equipment. Companies that establish an integrated "chemicals + equipment + process" model will have greater stickiness and profit margin advantages. Market opportunities will be concentrated in three sectors: First, large-scale green substitution driven by declining prices of bio-based raw materials; second, increased demand for high-purity chemicals in the new energy vehicle battery manufacturing chain (electrode sheets, structural components, and module segments); and third, export-oriented formulations that meet overseas compliance requirements (REACH, EPA Safer Choice). Overall, the industry is transitioning from full competition to technology-driven competition, possessing long-term growth certainty.

The global Environmentally Friendly Industrial Cleaning Agents market size was estimated at USD 33670.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Environmentally Friendly Industrial Cleaning Agents market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and

+357 96 030922

challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Environmentally Friendly Industrial Cleaning Agents market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Environmentally Friendly Industrial Cleaning Agents market.

Global Environmentally Friendly Industrial Cleaning Agents Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.

Chapter Outline

Chapter 1 mainly introduces the statistical scope of the report, market division standards, and market research methods.

Chapter 2 is an executive summary of different market segments (by region, product type, application, etc), including the market size of each market segment, future development potential, and so on. It offers a high-level view of the current state of the Environmentally Friendly Industrial Cleaning Agents Market and its likely evolution in the short to mid-term, and long term.

Chapter 3 makes a detailed analysis of the market's competitive landscape of the market and provides the market share, capacity, output, price, latest development plan, merger, and acquisition information of the main manufacturers in the market.

Chapter 4 is the analysis of the whole market industrial chain, including the upstream and downstream of the industry, as well as Porter's five forces analysis.

Chapter 5 introduces the latest developments of the market, the driving factors and restrictive factors of the market, the challenges and risks faced by manufacturers in the industry, and the analysis of relevant policies in the industry.

Chapter 6 provides the analysis of various market segments according to product types, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different market segments.

Chapter 7 provides the analysis of various market segments according to application, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different downstream markets.

Chapter 8 provides a quantitative analysis of the market size and development potential

of each region and its main countries and introduces the market development, future development prospects, market space, and capacity of each country in the world.

Chapter 9 shares the main producing countries of Environmentally Friendly Industrial Cleaning Agents, their output value, profit level, regional supply, production capacity layout, etc. from the supply side.

Chapter 10 introduces the basic situation of the main companies in the market in detail, including product sales revenue, sales volume, price, gross profit margin, market share, product introduction, recent development, etc.

Chapter 11 provides a quantitative analysis of the market size and development potential of each region in the next five years.

Chapter 12 provides a quantitative analysis of the market size and development potential of each market segment in the next five years.

Chapter 13 is the main points and conclusions of the report.

Key Reasons to Buy this Report:

Access to date statistics compiled by our researchers. These provide you with historical and forecast data, which is analyzed to tell you why your market is set to change

This enables you to anticipate market changes to remain ahead of your competitors

You will be able to copy data from the Excel spreadsheet straight into your marketing plans, business presentations, or other strategic documents

The concise analysis, clear graph, and table format will enable you to pinpoint the information you require quickly

Provision of market value data for each segment and sub-segment
