The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on EOBD Scanner competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global EOBD scanner sales will reach approximately 21 million units, with an average unit price of approximately US\$120. This device is a type of intelligent detection tool based on the European On-Board Diagnostics (EOBD) standard. It is widely used to identify engine and emission system fault codes, monitor the operating status of vehicle sensors, and support real-time data stream reading and report generation. It primarily serves vehicle repair, inspection stations, and individual vehicle owners for vehicle health management. Its functions range from basic troubleshooting to complex diagnostic analysis, and are commonly found in handheld and Bluetooth wireless versions. Its upstream supply relies on the supply of chips, sensor interface modules, and in-vehicle communication protocol adapters (such as CAN bus and ISO 9141-2). Its downstream supply targets automotive after-sales service providers, testing and certification agencies, and the consumer vehicle owner market, forming a relatively complete automotive diagnostic ecosystem.

The global EOBD Scanner market size was estimated at USD 2517.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the forecast period.
