## Abstracts

Epoxy coating systems refer to a type of protective coating that utilizes epoxy resins as a key component. Epoxy resins are polymers formed from the reaction of epoxides, which are monomers containing a cyclic ether group, with a curing agent. When these resins are applied to a surface and allowed to cure, they create a hard, durable, and chemically resistant coating. There has been a growing emphasis on environmentally friendly coatings. Waterborne epoxy coatings and formulations with reduced or no solvent content gained popularity due to their lower environmental impact and compliance with stricter regulations.

The global Epoxy Coating Systems market size was estimated at USD 410.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
