Abstracts

Epoxy Molding Compounds (EMCs) for semiconductor encapsulation are specialized materials used to protect and insulate electronic components such as integrated circuits (ICs), discrete devices, and power modules. These compounds provide superior mechanical strength, chemical resistance, and thermal stability, ensuring the reliability and longevity of semiconductor devices. EMCs are available in solid and liquid forms, with solid EMCs currently dominating the market. However, liquid EMCs are gaining popularity due to their suitability for advanced applications like molded underfill (MUF) and underfill in compact and high-performance semiconductor designs.

Market TrendsThe global Epoxy Molding Compounds market for semiconductor encapsulation is highly concentrated, with leading manufacturers based in Japan, China, and Korea. Companies such as Sumitomo Bakelite, Showa Denko, Chang Chun Group, and KCC play a significant role in driving innovation and meeting global demand. Integrated circuits (ICs), including memory and non-memory types, represent the largest downstream application of EMCs. Solid EMCs account for a major share of the market, but the growing adoption of liquid EMCs, driven by the need for advanced packaging solutions in high-density and high-performance semiconductors, is reshaping market dynamics.

Applications and OpportunitiesEpoxy Molding Compounds are crucial in semiconductor encapsulation for applications across memory devices, discrete components, and power modules. As the electronics industry moves towards miniaturization and increased functionality, the demand for liquid EMCs, particularly in MUF and underfill applications, is expected to grow significantly. The rise of 5G, IoT, and electric vehicles presents further opportunities for EMCs, as these technologies require robust packaging materials to enhance performance and durability. Manufacturers focusing on developing eco-friendly and high-performance EMCs are well-positioned to capitalize on these emerging trends.

The global Epoxy Molding Compounds for Semiconductor Encapsulation market size was estimated at USD 2564.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
