Abstracts

Equity crowdfunding services operate as digital marketplaces that enable privately-held companies to raise capital from a broad base of non-accredited and accredited investors in exchange for equity shares or other securities, typically through specialized online platforms regulated under frameworks such as Regulation Crowdfunding (Reg CF) in the U.S. or equivalent legislation in other jurisdictions. These platforms facilitate due diligence, investor communication, legal compliance, and transaction processing, democratizing access to early-stage investment opportunities while providing startups and small businesses with an alternative to traditional venture capital or bank financing.
