Report Overview

The Chinese mitten crab (*Eriocheir sinensis*) is a highly valued crustacean native to East Asia, particularly China, where it is renowned for its rich, flavorful roe and tender meat, making it a delicacy in regional cuisines. The market for *Eriocheir sinensis* is driven by strong domestic demand in China, especially during the Mid-Autumn Festival, when its consumption peaks due to cultural significance. Additionally, there is growing international demand, particularly in Southeast Asia, North America, and Europe, where Chinese diaspora communities and high-end restaurants seek premium-quality crabs. The industry is supported by aquaculture, as wild populations face overharvesting and ecological concerns, leading to strict regulations in some regions. Pricing fluctuates based on size, gender (females with roe command higher prices), and seasonal availability, with premium live crabs often sold at a significant markup. Sustainability concerns, including invasive species risks in non-native habitats, and the need for eco-friendly farming practices are increasingly shaping market dynamics. The competitive landscape includes both large-scale commercial farms and smaller producers, with branding and geographical indications (e.g., Yangcheng Lake crabs) playing a crucial role in product differentiation and premium pricing.

The global *Eriocheir Sinensis* market size was estimated at USD 329.86 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
