## Abstracts

Erythritol is a white crystalline powder with a clean sweet taste that is similar to sucrose. It is approximately 70% as sweet as sucrose and flows easily due to its non-hygroscopic character. Like other polyols, erythritol does not promote tooth decay and is safe for people with diabetes. However, erythritol's caloric value of zero calories per gram and high digestive tolerance distinguishes it from other polyols. Global erythritol key players include Cargill, Shandong Sanyuan Biotechnology and Baolingbao Biology etc. Global top 3 manufacturers hold a share over 67%. China is the largest market, with a share about 73%, followed by North America and Europe, together have a share over 22 percent.
