Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Escalator Motor competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of escalator motors reached 44,800 units, with an average selling price of \$18,341 per unit. Escalator motors are specialized drive devices for escalators and moving walkways, belonging to the core power components of special equipment. They use a three-phase asynchronous motor or permanent magnet synchronous motor as the power source, and transmit power through couplings and reducers to drive the traction sprocket, which in turn drives the step chain in a cyclical motion.

Simultaneously, the handrail belt is driven by a synchronous belt or gear transmission. Escalator motors have a gross margin of 19.67% and a gross profit of \$3,607.67. Single-line capacity is 1,600-2,100 units/year. The upstream of escalator motors consists of core materials and components for elevator motors (non-oriented/oriented silicon steel, permanent magnet neodymium iron boron magnets, copper electromagnetic wire, precision bearings, and insulating materials), represented by companies such as Nippon Steel, POSCO, Hitachi Metals, Aurubis, SKF, and Schaeffler. The midstream consists of escalator motor manufacturing and integration (stator and rotor stamping, winding, magnetic circuit design, drive control module, and complete machine assembly), represented by companies such as Siemens, ABB, Nidec, WEG, Wolong Electric Drive, and Jiangte Motor. The downstream consists of escalator applications (commercial complexes, transportation hubs, public buildings, and industrial facilities), represented by companies such as Otis, Schindler, KONE, Mitsubishi Electric, ThyssenKrupp, and end users.

The global Escalator Motor market size was estimated at USD 822.0 million in 2025 and

is projected to grow at a compound annual growth rate (CAGR) of 4.40% during the forecast period.
