## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Escalator Tread Chain competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of escalator tread chains reached 577,900 units, with an average selling price of US\$294.37 per unit. Escalator tread chains are a power transmission and support device for steps. They consist of high-strength alloy chain links (such as manganese steel and chromium-molybdenum steel), sprockets, tensioning devices, and monitoring sensors. Power is transmitted through the meshing of chain links and drive gears, while maintaining the smooth operation and safety clearance of the steps to prevent "slippage-reverse" or "drag-squeezing" accidents. They must meet requirements for "non-harmful contact" mechanical properties, wear resistance, and fatigue life to ensure long-term reliable operation under high-frequency, heavy-load conditions. The gross profit margin of escalator tread chains is 16.71%, with a gross profit of US\$49.19. Single-line production capacity is 22,000-26,000 units per year. The upstream of escalator tread chains focuses on the supply of high-strength alloy materials and precision components, such as wear-resistant carbon steel and stainless steel chain links (representative companies: Baowu Steel, Hebei Iron & Steel Group, Nippon Steel), supplemented by lubricating bearings, anti-corrosion coatings, and high-precision machining equipment. Downstream applications cover escalator manufacturers (Otis, Mitsubishi, Kone), public transportation hubs (subways, airports), commercial complexes (shopping malls, hospitals), and industrial scenarios. Applications are made through elevator maintenance companies, general contractors, and other channels, ultimately achieving smooth escalator operation, efficient power transmission, and redundant safety protection.

The global Escalator Tread Chain market size was estimated at USD 170.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
