Abstracts

Ethereum Smart Contract MLM Software is an automated multi-level marketing (MLM) system based on the Ethereum blockchain, which implements distribution-level rule execution, commission distribution, and reward mechanisms through smart contract programming. Its core functions include automatically tracking user referral relationships, calculating and issuing cryptocurrency rewards (such as ETH or tokens) in real time according to preset algorithms, ensuring transparent and tamper-proof transaction records, and avoiding the centralized manipulation risks of traditional MLM through decentralized features. It is usually combined with a token economic model to incentivize user participation and fission. Ethereum blockchain is popular for building DApps (decentralized applications), and a multitude of smart-contract-based MLM projects are built on the Ethereum blockchain.
