PDN is an aqueous alkaline developer for positive photoresists, in particular Electrolube PRP positive photoresist. PDN should be diluted 1 part PDN to 4 parts demineralised water by volume and brought to 20-25°C for optimum performance (not below 20°C). According to the SEMI report, the semiconductor materials market will grow by 8.6% in 2022, reaching a market size of 69.8 billion US dollars new highs. Since semiconductor materials belong to high-tech barrier industries, most of the high-end products of semiconductor materials are currently concentrated in the United States, Japan, Germany and other countries and regions. From the perspective of demand, China Taiwan, China mainland, South Korea, Japan, and the United States are the largest semiconductor material markets in the world, accounting for more than 80% of the global market. In 2022, relying on its wafer foundry capabilities and advanced packaging base, China Taiwan continued to occupy the throne of the global semiconductor material market with sales of US\$16.17 billion; China had the strongest year-over-year growth in 2022, coming in second with \$13.87 billion in sales; South Korea remained the third-largest consumer of semiconductor materials.

The global EUV Photoresist Developer market size was estimated at USD 279.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.50% during the forecast period.
