## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on EVOH Resin competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Ethylene-Vinyl Alcohol Copolymer, short as EVOH, is thermoplastic polymer. EVOH resin, with outstanding gas barrier properties, is one of the three major barrier resins. EVOH resin is widely used in Food packaging and non-food packaging industry. As global environmental awareness increases, especially in Europe, policies and consumer demand are driving the demand for sustainable packaging materials. EVOH is gradually becoming an important choice for the packaging industry with its excellent barrier properties and environmental characteristics. Policies support the circular economy, require the increase of recycled materials in packaging, and reduce packaging waste, which provides broad development prospects for the application of EVOH materials in environmentally friendly packaging, especially in the fields of food and cosmetics packaging. The booming North American cosmetics market, especially the rapid growth of high-end products, has brought important market opportunities for the application of EVOH materials. The cosmetics industry has high requirements for packaging materials, and EVOH can meet the needs of this market with its high barrier properties and good processability. With the increase in demand in the high-end market, it is expected that the application of EVOH in cosmetic packaging will continue to expand, which will promote the further development of the North American EVOH market. The demand for EVOH film in the Asian market is growing steadily, especially in the application of insulation boards for refrigerators and packaging materials. With the rapid economic development and rising consumption levels in the Asian region, the market demand for high-performance packaging materials is increasing. The widespread application of EVOH film in the Asian market not only helps to increase the market

share in the region, but also promotes the steady expansion of the EVOH industry worldwide, bringing long-term growth opportunities for enterprises.

The global EVOH Resin market size was estimated at USD 1457.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global EVOH Resin market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
