Abstracts

Excimer Laser Annealing System) is a key piece of equipment used in semiconductor and display manufacturing. It uses excimer laser to perform annealing treatment, which uses high-energy beam to instantly heat the material surface to improve the crystal structure, eliminate defects and improve material performance. Semiconductors are a key enabling technology for a wide range of products in nearly every sector of our economy. Following strong growth of 26.2% in 2021, the global semiconductor market will show single-digit growth in 2022, with a total size of US\$580 billion and a growth rate of 4.4%. In 2022, all geographic regions except Asia Pacific will show double-digit growth. Sales in the Americas were US\$142.1 billion, a year-on-year increase of 17.0%, sales in Europe were US\$53.8 billion, a year-on-year increase of 12.6%, sales in Japan were US\$48.1 billion, a year-on-year increase of 10.0%, while sales in the largest region, the Asia-Pacific region, were US\$336.2 billion, a year-on-year decrease of 2.0%. According to the World Semiconductor Trade Statistics (WSTS), the industry experienced major ups and downs in 2022. While chip sales reached their highest annual total ever in 2022, a slowdown in the second half of the year significantly limited growth. In 2022, global semiconductor sales will reach US\$574 billion, of which US semiconductor companies' sales total US\$275 billion, accounting for 48% of the global market. In order to maintain industry competitiveness, U.S. semiconductor companies' investment in R&D has also reached a record high of US\$58.8 billion. Historically, the PC/computer and communications end markets have accounted for approximately two-thirds of total sales, with industries such as automotive, industrial and consumer electronics accounting for the remainder. But according to WSTS's 2022 Semiconductor End-Use Survey, sales in end markets in 2022 show clear changes. Although the PC/computer and communication terminal market will still account for the largest share of semiconductor sales in 2022, its lead has narrowed. Meanwhile, automotive and industrial applications experienced the largest growth this year.

The global Excimer Laser Annealing System market size was estimated at USD 1373.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.50% during the forecast period.
