Abstracts

The expansion vessel bracket is an accessory used to install the expansion vessel. Potable water expansion tanks/containers protect closed heating and hot water systems from the expansion and contraction of fluids. When water is heated, it expands and increases in volume. This water expansion can cause the system to leak and lose millions of liters of drinking water. This loss can be avoided by using an expansion vessel. Drinking water is an indispensable part of daily life, so it drives the steady growth of expansion vessels.

The global Expansion Vessel Brackets market size was estimated at USD 69.4 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.60% during the forecast period.
