Abstracts

An explosion proof gear motor is a specialized type of electric motor integrated with a gear reducer, engineered to operate safely in hazardous environments where flammable gases, vapors, dust, or fibers are present. It is constructed with robust, flame-path enclosures that can contain any internal explosion, prevent ignition of external atmospheres, and withstand high internal pressures without rupturing. These motors are rigorously tested and certified to meet international standards?such as ATEX, IECEx, or NEC?for use in industries like oil and gas, chemical processing, mining, pharmaceuticals, and grain handling, where standard motors could pose a significant ignition risk.

The global Explosion Proof Gear Motor market size was estimated at USD 850.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.20% during the forecast period.
